ELSEVIER

Mechanisms of Development 92 (2000) 323–324

Volume contents

Volume 92, No. 2 (2000)

Issue Contents 111

Original articles

T. Papenbrock, R.P. Visconti, A. Awgulewitsch (USA)
Loss of fibula in mice overexpressing *Hoxc11* 113

R. Gopal-Srivastava, W.T. Kays, J. Piatigorsky (USA)
Enhancer-independent promoter activity of the mouse αB-crystallin/small heat shock protein gene in the lens and cornea of transgenic mice 125

S.A. Jordan, I.J. Jackson (UK)
A late wave of melanoblast differentiation and rostrocaudal migration revealed in patch and rump-white embryos 135

J.L. Leatherman, K.H. Kaestner, T.A. Jongens (USA)
Identification of a mouse *germ cell-less* homologue with conserved activity in *Drosophila* 145

J.F. Martin, E. Hersperger, A. Simcox, A. Shearn (USA)
minidiscs encodes a putative amino acid transporter subunit required non-autonomously for imaginal cell proliferation 155

U. Ernsberger, E. Reissmann, I. Mason, H. Rohrer (Germany, UK)
The expression of dopamine β-hydroxylase, tyrosine hydroxylase, and Phox2 transcription factors in sympathetic neurons: evidence for common regulation during noradrenergic induction and diverging regulation later in development 169

U. Lammel, L. Meadows, H. Saumweber (Germany)
Analysis of *Drosophila* salivary gland, epidermis and CNS development suggests an additional function of *brinker* in anterior-posterior cell fate specification 179

J. Kramer, C. Hegert, K. Guan, A.M. Wobus, P.K. Müller, J. Rohwedel (Germany)
Embryonic stem cell-derived chondrogenic differentiation in vitro: activation by BMP-2 and BMP-4 193

D. Liu, D. Bei, H. Parmar, A. Matus (Switzerland)
Activity-regulated, cytoskeleton-associated protein (Arc) is essential for visceral endoderm organization during early embryogenesis 207

L.S. Gammill, H. Sive (USA)
Coincidence of *otx2* and BMP4 signaling correlates with *Xenopus* cement gland formation 217

A. Medina, W. Reintsch, H. Steinbeisser (Germany)
Xenopus frizzled 7 can act in canonical and non-canonical Wnt signaling pathways: implications on early patterning and morphogenesis 227

T. Darribère, J.E. Schwarzbauer (France, USA)
Fibronectin matrix composition and organization can regulate cell migration during amphibian development 239

C.M. Blaumueller, M. Mlodzik (Germany)
The *Drosophila* tumor suppressor *expanded* regulates growth, apoptosis, and patterning during development 251

K.J. Sweeney, G.D. Clark, A. Prokscha, W.B. Dobyns, G. Eichele (Germany, USA)
Lissencephaly associated mutations suggest a requirement for the PAFAH1B heterotrimeric complex in brain development 263

Gene expression patterns

A. Sato, M. Asashima, T. Yokota, R. Nishinakamura (Japan)
Cloning and expression pattern of a *Xenopus* pronephros-specific gene, XSMP-30 273

R. Passier, J.A. Richardson, E.N. Olson (USA)
Oracle, a novel PDZ-LIM domain protein expressed in heart and skeletal muscle 277

E. Frolova, D. Beebe (USA)
The expression pattern of a novel *Deltex* homologue during chicken embryogenesis 285

K.G. Johnson, C.E. Holt (UK)
Expression of CRYP-α, LAR, PTP-δ, and PTP-ρ in the developing *Xenopus* visual system 291

V. Sapin, P. Bouillet, M. Oulad-Abdelghani, B. Dastugue, P. Chambon, P. Dollé (France)
Differential expression of retinoic acid-inducible (*Stra*) genes during mouse placentation 295

V. Tarabykin, O. Britanova, A. Fradkov, A. Voss, L.S. Katz, S. Lukyanov, P. Gruss (Germany, Russia, USA)
Expression of PTTG and *prc1* genes during telencephalic neurogenesis 301

C. Howley, R.K. Ho (USA)
mRNA localization patterns in zebrafish oocytes 305

A. Nasevicius, T.M. Hyatt, S.B. Hermanson, S.C. Ekker (USA)
Sequence, expression, and location of Zebrafish frizzled 10 311
